DevOps Engineers

Description

This role will focus on Azure DevOps, CI/CD pipelines, and infrastructure automation, with an emphasis on collaborative skills and innovative problem-solving abilities.

Key Responsibilities:

- Design, implement, and manage CI/CD pipelines using Azure DevOps to ensure smooth and efficient software delivery.
- Automate infrastructure provisioning, configuration, and deployment using tools such as Terraform, Ansible, or ARM templates.
- Collaborate with development, QA, and operations teams to streamline build and release processes.
- Troubleshoot and resolve issues related to build, deployment, and infrastructure.
- Monitor and optimize system performance, availability, and reliability.
- Ensure security best practices are followed throughout the DevOps lifecycle.
- Mentor junior team members and provide guidance on best practices for DevOps and automation.
- Stay up-to-date with the latest industry trends and technologies to continuously improve our DevOps processes.

Required Skills:

- Proven experience as a DevOps Engineer with a focus on Azure DevOps and CI/CD pipelines.
- Strong knowledge of infrastructure automation tools such as Terraform, Ansible, or ARM templates.
- Proficiency in scripting languages such as PowerShell, Bash, or Python.
- Experience with containerization technologies such as Docker and Kubernetes.
- Excellent problem-solving skills and the ability to think creatively to address complex challenges.
- Strong collaboration and communication skills, with the ability to work effectively in a team environment.
- Familiarity with cloud security best practices and tools.
