Full Stack Developers

Employment Type
Full-time

Job Location
Abu Dhabi, United Arab Emirates

Industry
IT

Description

As a Full Stack Developer, you will be responsible for developing and maintaining cutting-edge applications and systems, working closely with front-end and back-end developers, mobile app developers, UI/UX designers, QA engineers, platform specialists, RPA engineers, CRM specialists, CMS specialists, and the infrastructure team.

Key Responsibilities:

- Design, develop, and maintain full-stack applications, ensuring high performance and responsiveness.
- Collaborate with cross-functional teams to define, design, and deliver new features and enhancements.
- Write clean, scalable, and maintainable code, adhering to industry standards and best practices.
- Conduct code reviews and provide constructive feedback to teammates.
- Identify and resolve technical issues and bugs in a timely manner.
- Participate in the entire application lifecycle, from concept and design to testing and deployment.
- Stay up-to-date with emerging technologies and trends, continuously improving your skills and knowledge

Required Skills:

- Proven experience as a Full Stack Developer, with expertise in both front-end and back- end development.
- Proficiency in HTML, CSS, JavaScript, and modern front-end frameworks (e.g., React, Angular, Vue.js).
- Strong knowledge of server-side languages (e.g., C#, Java, Node.js, Python, Ruby, PHP) and frameworks (e.g., Express, Django, Rails, Laravel).
- Experience with database management systems (e.g., MS SQL Server, MySQL, PostgreSQL, MongoDB).
- Familiarity with version control systems (e.g., Git) and continuous integration/continuous deployment (CI/CD) pipelines.
- Understanding of UI/UX design principles and quality assurance processes.
- Excellent problem-solving skills and attention to detail.
- Strong communication and teamwork skills, with the ability to collaborate effectively with diverse teams.
